

Bring you angels

Bring you angels

I see your eyes as a reflection of the moon

I see your soul better than yourself

And I know what you want, 'cause I wanted it too

Tempted to sell ourselves and other foolish things we do

Wait a minute, hang on

I'll remind you, it's not all gone

Chorus:

Let me bring you

Ten thousand angels to your bed tonight

Let me light

Ten thousand candles and spread them all around

Let me sing you to sleep and hold you close to me

Let me bring you angels... to you

I know what you need, how it's crying in the night
Who's gonna see you and love you right
No one's gonna say it, 'cause no one's got a clue
We work ourselves tired and other foolish things we do

Wait a minute, I'll lend you my faith
I'll remind you how to stand up straight

Chorus: Let me bring you...

Extra chorus:

Let me bring you angels
Let me show you what you forgot
'cause no one said it to your face
Let me remind you of your youth, those loving days
When you saw angels... close... to you
